

Hourglass™

pocket springs

Imagery, non-woven colours, and listed specifications are non-contractual and subject to change without notice.

Stress-relieved wire holds its shape and creates a durable, more consistent sleep surface.

Relaxing comfort, responsive support.

Hourglass™ pocketed innersprings have a distinct design that delivers initial softness, followed by increasing support. The top and bottom of the coil are wider, producing the soft, relaxing feel. Then, as weight is applied, the tightly formed centre of the coil offers a firmer level of support.

The overall effect is immediate softness and comfort followed by good, responsive support as more pressure is applied. This iconic design responds quickly to the shape and movement of individual bodies as they change sleeping positions. Each spring is encased in its own pocket, allowing it to flex independently, optimizing its performance.

- Premium-quality innersprings with a distinctive, progressive design
- Pocketed innersprings help reduce partner disturbance and roll-together
- High-quality wire from our vertically integrated wire-drawing process
- Innersprings sleep up to **28% cooler** than foam*

Variable-rate geometry gives **Hourglass™** its distinctive look and responsive performance.

An industry leader bringing you a new industry standard.

Leggett & Platt is a diversified manufacturer (and member of the S&P 500) that conceives, designs, and produces a broad variety of engineering components and products for the bedding industry and other market sectors worldwide.
