

CC3 next-generation continuous coil innerspring systems utilise proprietary technology and a patented design to maximise comfort delivery and minimise partner disturbance.

- **Innovative Design** – Distinctive offset profile head delivers greater unit stability and sleep-surface coverage.
- **Performance focussed** – Engineered to support the body and bridge the firmness-level gap between continuous coil innersprings and the rest of the field.
- **Comfort-driven** – Premium-quality continuous coil product developed to match body positioning and actively reduce motion transfer and roll-together.
- **Sustainability** – Optimised manufacturing process increases production efficiency and promotes mindful usage of materials.
- **Quality Steel** – Leggett & Platt draws its own wire to ensure quality-controlled steel in every coil.

Next-generation CC3 continuous coil
