

The iconic Mira-Coil® innerspring system is made up of continuous strands of specially formed wire that provide the optimum in surface comfort, weight distribution, body conformity, and essential support.

- **Innovative Concept** – The continuous-coil design of Mira-Coil® maximises surface coverage and all-around support performance.
- **Responsive Support** – Creates a highly stable sleep surface that is supportive all the way to the edge, offering minimised partner disturbance, as well as no roll-together or roll-off.
- **Stress-Relieved Wire** – Holds its shape and creates a more durable and consistent innerspring.
- **Quality Steel** – Leggett & Platt draws its own wire to ensure quality-controlled steel in every coil.
