

ProZone® is a programmable Bonnell innerspring system that uses fully automated, computer-controlled zoning technology to produce coils of varying diameter and firmness level in specified zones.

- **Opportunity** – Multiple configuration options provide greater flexibility than more traditional Bonnell zoning applications.
- **Consistency and Value** – 100% automated system ensures consistent quality while the benefits of zoning add comfort and additional end-user value.
- **Stress-Relieved Wire** – Holds its shape and creates a more durable and consistent innerspring.
- **Quality Steel** – Leggett & Platt draws its own wire to ensure quality-controlled steel in every coil.
