

Quantum Edge® forms a steel perimeter around select pocket systems, providing durable and dynamic innerspring edge support, as well as comfort consistency across the entire sleep surface.

- **Quantum Edge® Coils** – Reinforced sides, made up of narrow-diameter Quantum Edge coils, provide consistency at the edge of the sleep surface, reducing that roll-off feeling.
- **Caliber Edge® Coils** – Located at the head and foot, these firmer coils complement the reinforced sides to complete the perimeter and create a highly supportive edge.
- **Sustainability** – Reduces mattress build time and eliminates the need for foam borders, cutting costs, saving time, and increasing recyclability.
- **Quality Steel** – Leggett & Platt draws its own wire to ensure quality-controlled steel in every spring.
- **Packable and Shippable** – Can be compressed, folded, and rolled.

Reinforced Quantum Edge®  
dynamic spring perimeter
