

VertiNova® next-generation innerspring systems redefine open-coil standards by delivering optimized support across the entire unit due to its unique set of physical and performance attributes.

- **Innovative Design** – Engineered with alternating offset coils to evenly distribute weight and neutralize force.
- **Responsive Support** – Provides a more consistent, stable, and effective sleep surface with greater coverage and support all the way to the edge.
- **Sustainability** – Increases manufacturing efficiency through optimised raw material content and mattress recyclability via mono-material separation opportunities.
- **Stress-Relieved Wire** – Holds its shape and creates a more durable and consistent innerspring.
- **Quality Steel** – Leggett & Platt draws its own wire to ensure quality-controlled steel in every coil.

Alternating offset VertiNova® coils
