

Multi-layer product combinations provide superior comfort, performance, and overall system coil counts. The open structure of multiple innerspring layers enhances the natural flow of air and provides softness and support in a variety of different ways.

- **Multi-Level Comfort** – Combine a variety of innovative L&P innerspring products to achieve a higher level of comfort or deliver a specific type of support performance.
- **Advanced Configuration Technology** – Leggett & Platt’s ability to combine products enhances comfort and cooling while maintaining durability and boosting coil counts.
- **Customised Solutions** – Create unique, compelling comfort stories with expanded specification, range, and height potential.
- **Sustainability** – Designed and developed with a more efficient use of material content, and achievable through a number of innovative layer-to-layer connection technologies.
- **Quality Steel** – Leggett & Platt draws its own wire to ensure quality-controlled steel in every spring.

Multi-Layer pocket innerspring combination systems
