

Our Standard and higher-resolution Compact pocket innersprings are comfortable, responsive, and durable. These individually pocketed springs isolate motion transfer to help minimise partner disturbance.

- **Supportive** – Each pre-compressed coil flexes independently to maximise performance and deliver support where it's needed.
- **Responsive** – Creates an even sleep surface that reacts to even the smallest changes in weight, shape, and movement.
- **Stress-Relieved Wire** – Holds its shape and provides greater durability and performance consistency.
- **Quality Steel** – Leggett & Platt draws its own wire to ensure quality-controlled steel in every spring.
- **Packable and Shippable** – Can be compressed, folded, and rolled.

Pre-compressed Standard and Compact pocket springs
